

DROWNING Report

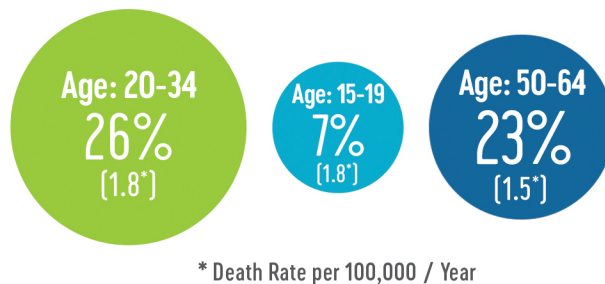

Prepared for the Lifesaving Society by the Drowning Prevention Research Centre Canada

This infographic summarizes the most recent data on water-related fatalities available from the Office of the Chief Coroner for British Columbia. With the exception of the first chart, all data refers to the most current five-year period, 2013-2017. The 2016 and 2017 data sets for BC are based on partial data. Not all data were available at the time of data collection.

BRITISH COLUMBIA WATER-RELATED FATALITIES AND DEATH RATES, 2008-2017

WHO IS DROWNING?

WHERE?

WHEN?

? WHAT WERE THEY DOING?

WATER-RELATED FATALITIES BY MOST COMMON RECREATIONAL ACTIVITY

*The person intended to be in the water (e.g. swimming/wading)

**Unintentional fall into water (e.g. walking/biking/working near water and fell in)

! WHY? RISK FACTORS

CHILDREN <5 YEARS

88%
Supervision Absent or Distracted

YOUNG ADULTS 15-34 YEARS

OLDER ADULTS 35-64 YEARS

OLDER ADULTS 65+ YEARS

Not Wearing a PFD

Alcohol Consumption

Alone

Weak or Non-Swimmer

BOATING

SWIMMING

METHODS:

Water-related death data is extracted from the office of the Chief Coroner or Medical Examiner for each province and territory. Data is collected for all deaths resulting from incidents "in, on or near" water. "Near water" incidents were included if the intent was closely related to water-based recreational, vocational or daily living activity. The data includes only unintentional deaths, not deaths due to natural causes, suicide, or homicide.

ACKNOWLEDGEMENTS:

We gratefully acknowledge the support, co-operation and efforts of:

- The Chief Coroner's and Medical Examiner's Offices in each province/territory, who permitted and facilitated confidential access to coroner's reports on unintentional water-related deaths.
- The volunteers who contributed their time and energy to extract data from the files.
